

KARAN RAVINDRA CHAVAN

FULL-STACK DEVELOPER

Thane, Maharashtra | +91-8097282559 | karan287.dev@gmail.com
GitHub | LinkedIn | Leetcode | Portfolio

SUMMARY

Creative Full-Stack Developer with expertise in building real-time web ecosystems, interactive 3D graphics, and high-performance applications. Strong foundational knowledge in Data Structures and Algorithms (DSA), network communication protocols, and cloud-integrated database design. Adept at transforming complex technical challenges into scalable, production-ready software solutions.

EDUCATION

B.E. in Computer Engineering

Terna Engineering College

Expected 2027

CGPA: 9.0/10

Higher Secondary Certificate (HSC)

V. G. Vaze College

2023

Percentage: 68.8/100

SKILLS

Programming:	Python, C++, C, TypeScript, JavaScript, SQL, Shell (Bash)
Frontend:	React.js, Next.js, TailwindCSS
Backend:	Node.js, Express.js, REST APIs, WebSockets, JWT
Databases:	PostgreSQL, MongoDB
Core:	DSA, DBMS, OS, Computer Networks
Design Tools:	Canva, Figma
Soft Skills:	Communication, Time Management, Creativity, Collaboration

EXPERIENCE

Oasis Infobyte - Web Developer Intern

Remote | Feb 2026 – Mar 2026

- Engineered a full-stack Pizza Delivery Platform using the MERN stack, integrating Three.js for an interactive 3D ingredient customization window and Razorpay API for seamless end-to-end payment processing.
- Architected a smart inventory system and real-time dashboard using Node.js and MongoDB that dynamically tracks stock, triggers automated low-inventory email alerts, and instantly syncs order status updates.
- Implemented secure full-cycle user authentication, including registration, JWT-based session handling, email verification, and an automated "forgot password" recovery workflow.

PROJECTS

- WS ChatApp – Multi-Room WebSocket Networking App (Node.js, WebSockets, TypeScript):** Engineered a real-time chat application implementing custom communication protocols. Features instant room creation, automated member broadcasting, and persistent low-latency state management without traditional database overhead. Tech: Node.js, WebSockets (WS API), TypeScript, Express. (2026)
- Bharat Yatra – 3D Educational Culture Game (Three.js, React, WebGL):** Developed an interactive, education-focused platformer game designed to teach children about regional Indian cultures and forgotten traditions. Features a responsive 3D map navigation layer and gamified geographic milestones. Tech: Three.js, ReactJS, TypeScript, WebGL, HTML5 Canvas, Git. (2026)
- Interactive Canvas & Creative Simulation Suite (JavaScript, Math-Based UI, HTML5):** Programmed a large-scale collection of high-performance physics and graphic simulations (including Mario-type platformers, Perlin noise fireflies, neural particles, and wave physics) optimizing runtime performance directly on the HTML5 Canvas. Tech: Vanilla JavaScript, HTML5 Canvas, Perlin Noise Algorithms, Physics-based Vectors. (2025-2026)
